# KITS PSX. Trade with clarity.

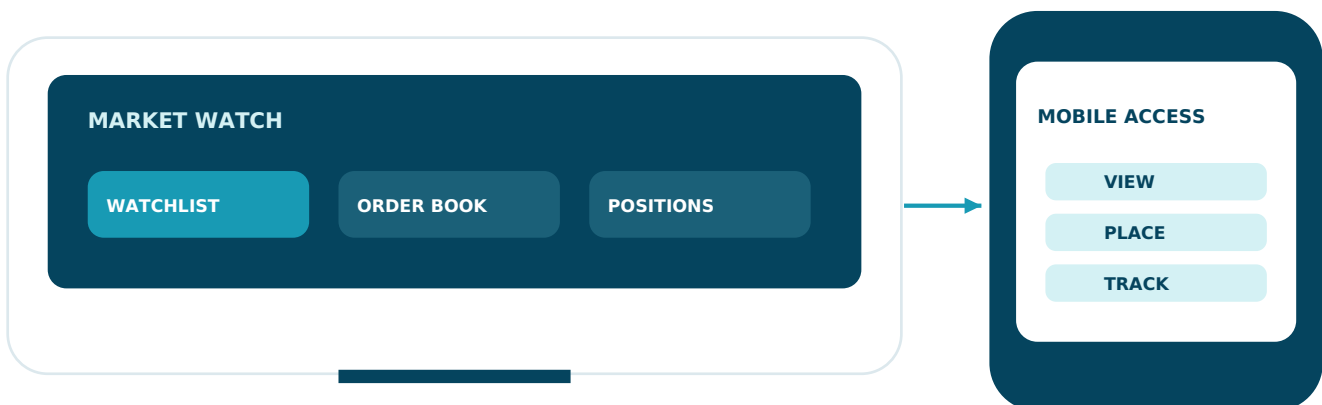

Platform information + desktop and mobile manuals  
A detailed reference for JISPL clients

UNDERSTAND / SET UP / USE

## KARACHI INTERNET TRADING SYSTEM

# Stay connected to your trading account

Learn how KITS supports market monitoring, order entry and account visibility through your broker. Use this practical reference to understand the platform and build a consistent order-checking routine.

Conceptual illustration. Screen design and available features depend on the broker-approved application.

**Edition:** 17 October 2026 | **Language:** English

**Purpose:** Client education; no live prices or investment recommendations.

## YOUR REFERENCE MAP

# Platform guide + manuals

One reference for understanding KITS, learning the screens and checking every order.

| Section                 | Pages | What you will find                                                                        |
|-------------------------|-------|-------------------------------------------------------------------------------------------|
| Platform information    | 3-9   | Access choices, setup, order workflow, benefits, troubleshooting and JISPL contacts.      |
| Desktop manual          | 10-29 | Navigation guide followed by all 19 supplied desktop pages, with JISPL document branding. |
| Mobile manual           | 30-39 | Navigation guide followed by all 9 supplied mobile pages, with JISPL document branding.   |
| Practical order routine | 40    | Before, during and after placing an order; handling an uncertain result.                  |
| Worked example          | 41    | Illustrative limit order, partial execution and cancellation checks.                      |
| Coverage and support    | 42    | Source coverage, legacy-screen notes and JISPL support details.                           |

## HOW TO USE THE SCREEN PAGES

Read the lettered labels beside each screenshot. Treat prices, dates, account names and symbols inside those screens as historical examples. Follow the current JISPL-approved application for live use.

## 01 / UNDERSTANDING KITS PSX

# What KITS does for you

An online trading interface connects the investor to the market through a brokerage account.

KITS stands for **Karachi Internet Trading System**. PSX describes it as the platform underlying online trading applications offered by brokerage houses. It lets investors access account information and trading functions electronically. [1]

**WATCH THE MARKET**

Monitor the market information and watchlists available in your application. Check the quote time and connection status before acting.

**MANAGE ORDERS**

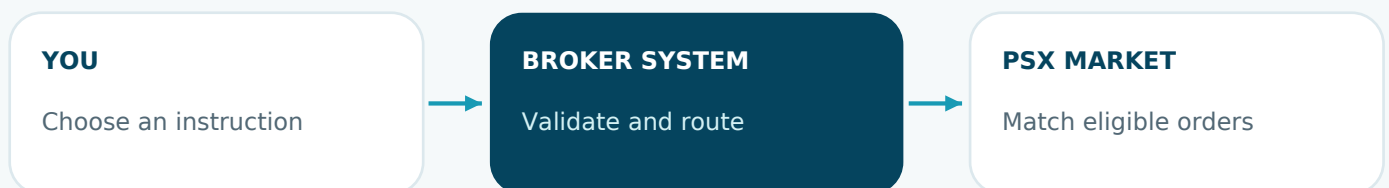

Enter buy or sell instructions and review their status. Submission, acceptance and execution are separate stages.

**SEE YOUR ACCOUNT**

PSX identifies cash position, trade summaries, trade confirmations and custody position among the information available through KITS. [1]

**KEEP CONTROL**

Use the application to support your own decisions and record keeping. The broker still handles account permissions, limits and client support.

**HOW THE CONNECTION WORKS**

Online access does not remove the brokerage relationship or the need for account approval, funding and the relevant trading permissions.

## 02 / ACCESS OPTIONS

# Desktop and mobile access

Choose the approved route that fits your device, routine and account permissions.

| What to compare  | Desktop / laptop                                                                               | Mobile device                                                                                       |
|------------------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| Working style    | Larger workspace for reviewing watchlists, orders and account information.                     | Convenient access while away from your usual workstation.                                           |
| Getting the app  | Use the download or installer confirmed by JISPL. Follow its installation instructions.        | Ask JISPL for the correct Android or iOS listing and supported version before installing.           |
| Before first use | Confirm operating system, Java requirements where relevant, and the approved server details.   | Check the publisher, permissions, device compatibility and broker/server selection.                 |
| Daily use        | Keep the application and required components updated. Confirm connectivity before order entry. | Protect the device, review order details carefully on the smaller screen and log out when finished. |

## DESKTOP TECHNICAL NOTE

A PSX notice dated 13 March 2025 required Java 1.8.401 or higher for its Trade Cast desktop SSL upgrade. This is a dated requirement, not a permanent installation specification. Confirm current requirements with JISPL. [2]

PSX maintains an online trading download page and directs client support queries to the broker/TREC holder. Use [kits.psx.com.pk](https://kits.psx.com.pk) with JISPL guidance. [3]

Mobile-store availability and enabled functions can change. Obtain current mobile installation links directly from JISPL.

## 03 / GETTING STARTED

# From account to first login

Complete the setup before attempting a live order. Ask JISPL for help with any unfamiliar screen.

- 1 Open and verify your brokerage account**  
Complete the account forms and identity/KYC requirements. Confirm your registered email, mobile number and account details.
- 2 Request online trading activation**  
Ask JISPL whether KITS access is enabled for your account and which products, channels and permissions are available.
- 3 Confirm the software and costs**  
Obtain the approved download link, device requirements and server details. Confirm applicable subscription fees, commission, taxes and other charges.
- 4 Activate your login securely**  
Receive credentials through the agreed channel. Change the initial password when prompted and use additional authentication where available.
- 5 Check balances and learn the screens**  
Confirm available cash, relevant holdings and buying power. Locate the market watch, order book, trade confirmations and account information.
- 6 Check readiness before a live order**  
Verify market/session availability, the correct account and the order details. Ask for a walkthrough if you are unsure how a function works.

**Keep:** your account documents, tariff, support contacts and confirmations. Never share your password, PIN or OTP with another person.

## 04 / ORDER PLACEMENT

# Follow the order through

An order entry is an instruction. A trade exists only when an execution has occurred.

**1 PREPARE**

Check symbol, market, buy/sell side, quantity, price and validity.

**2 REVIEW & SUBMIT**

Confirm the account, available funds/holdings and estimated charges.

**3 CHECK THE ACKNOWLEDGMENT**

Read the order ID, status or rejection message before doing anything else.

**ACCEPTED / PENDING**

The order may wait for a match, fill partially or remain unfilled. Track the unexecuted quantity.

**REJECTED / UNCERTAIN**

Read the reason or check status with JISPL. Avoid resubmitting until you know whether the original order exists.

**AFTER EXECUTION**

Review the filled quantity, execution price, charges and trade confirmation. A cancellation request does not reverse a completed trade. Any remaining open quantity must be checked separately.

Workflow illustration only. Actual status names, order types, validation rules and modification/cancellation functions depend on your application and market.

## 05 / BENEFITS & MARKET ACCESS

# Why efficiency matters

The value of a trading tool comes from clearer information and a more consistent process.

| Benefit              | How it helps                                                                                             | A practical habit                                                                                    |
|----------------------|----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| Faster communication | Direct order entry can reduce reliance on relaying each instruction by telephone.                        | Review once carefully before submitting; speed does not compensate for the wrong symbol or quantity. |
| Visibility           | Order and account records make it easier to check what has happened.                                     | Compare the order book, executions and contract notes instead of relying on a single screen.         |
| Flexibility          | Desktop and mobile access can support different working routines.                                        | Use the channel approved for your account and avoid duplicate instructions across devices.           |
| Wider participation  | Online access can make market participation more practical for investors beyond major financial centres. | Maintain reliable connectivity and a verified way to contact the broker when the app is unavailable. |
| Cost awareness       | A clearer workflow can reduce avoidable operational mistakes.                                            | Confirm all actual fees; an online platform does not make trading cost-free or guarantee savings.    |

### THE IMPORTANCE OF KITS IN PAKISTAN

Economic news, company announcements and changes in market liquidity can affect trading conditions. Digital access helps investors remain informed, while research, position sizing and a clear investment plan remain essential.

## 06 / CHALLENGES & CONSIDERATIONS

# Handle problems methodically

Protect your account and establish the order status before taking another trading action.

| Situation                     | What to check                                                                                 | Next step                                                                                              |
|-------------------------------|-----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| Slow or disconnected screen   | Internet connection, application status and the timestamp of the displayed information.       | Pause order entry. Reconnect and verify existing orders before trying again.                           |
| No acknowledgment             | Order book, messages and any order reference already generated.                               | Contact JISPL if status remains unclear. Repeated clicks can create unintended duplicate instructions. |
| Order rejected                | The displayed reason, permitted market, funds, holdings and order details.                    | Correct only the identified issue. Ask JISPL when a rejection reason is unclear.                       |
| Login or installation problem | Official installer, device compatibility, approved server and current component requirements. | Use JISPL support. Do not disable security controls or install files from an unknown sender.           |
| Unrecognized activity         | Order IDs, execution details, alerts and relevant screenshots.                                | Notify JISPL promptly, request protective action and send a written complaint with evidence.           |

### TOOLS DO NOT REMOVE MARKET RISK

Prices can move before an order matches. Liquidity may be limited, an order can remain unfilled, and losses are possible. Use the platform alongside company research and an investment plan; no trading system guarantees a profit.

**07 / QUICK ANSWERS & SUPPORT**

# Use KITS with confidence

Conclusion: combine digital access with careful instructions, verification and a reliable support route.

**Do I need a brokerage account?**

Yes. Online trading access operates through an approved brokerage account. Ask JISPL about activation and account permissions.

**Can I trade from a phone?**

Ask JISPL for its current supported mobile option and official listing. Available applications and features depend on broker support and device compatibility.

**Does submitting an order guarantee a trade?**

No. Check acceptance, any rejection and the executed quantity. Price, liquidity and market conditions affect whether an order is filled.

**Who handles technical support?**

Contact your broker/TREC holder. PSX's KITS download page directs clients to their broker for support. [3]

# KiTS Trading Interface

---

## INTRODUCTION:

KiTS Trading Interface shows buying and selling rate of shares with respect to its symbol. Within its Market Watch, it contains more detailed information about each share. The user can buy or sell their shares through this application. Furthermore, the user can keep an eye on activities happening in the market. The detailed information about the features of Trade Cast Client is described below.

## 1. INSTALLATION AND FIRST ACCESS

Obtain the approved Windows installer and current Java requirements directly from JISPL. Confirm the correct application, publisher and connection settings before installation.

Use the User ID and password issued through your JISPL account activation process. The following reference screen shows the login controls. For current setup assistance, contact [jispl@jisecurities.com](mailto:jispl@jisecurities.com).

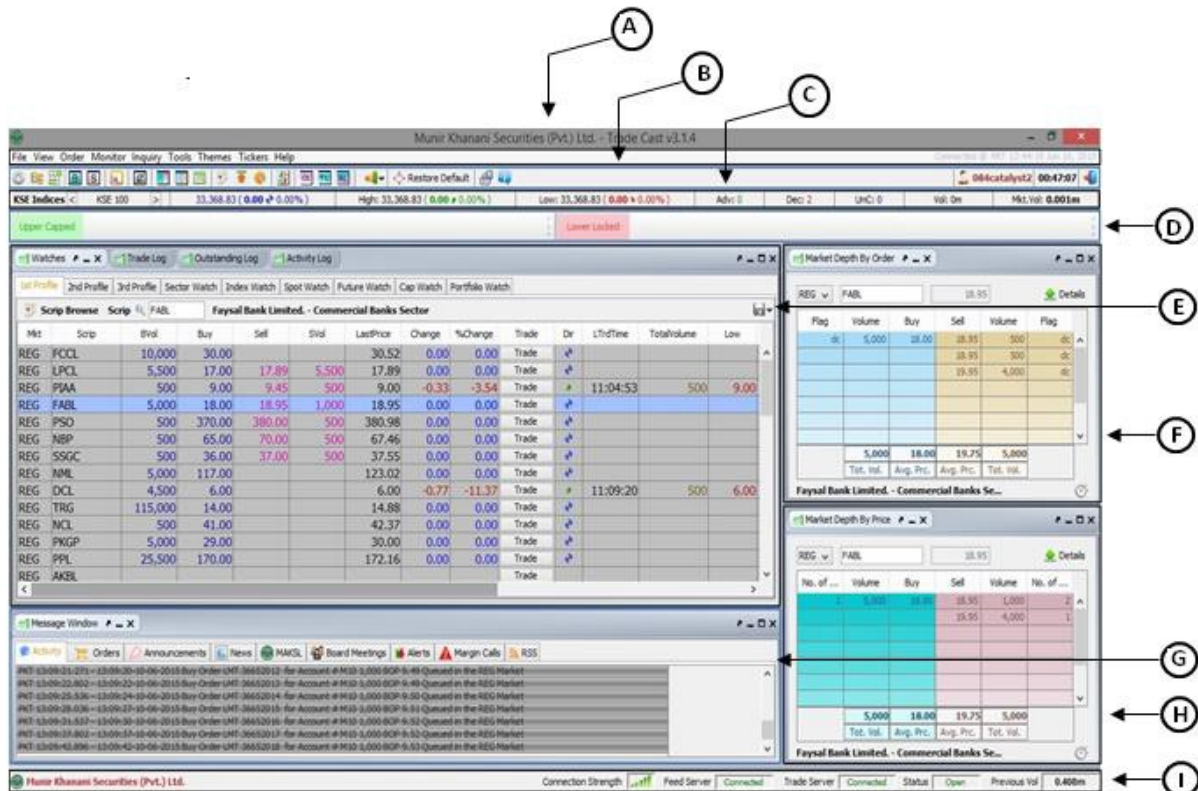

## Login Window

- A) Enter the 'User ID' here.
- B) Enter the 'Password' here.
- C) Proceed to enter the application, press the 'Login' button after providing user credentials
- D) To close the application click on 'Cancel' button.
- E) 'Forgot Password' use to recover the forgotten password

The screenshot shows the 'Trade Cast v3.1.4' login window. It features a 'User ID' text box (labeled A), a 'Forgot Password?' button (labeled E), and a 'Password' field consisting of ten character boxes (labeled B). Below the password field, a prompt asks the user to 'Please enter 1st, 3rd, 6th & 7th character of your password.' Below this is an example: 'Example: If your Password is q a Z s 1 2 q G, you would be required to enter the missing characters in white boxes.' This is followed by a row of ten boxes, with the 2nd, 3rd, 6th, and 7th boxes highlighted in white. Below these boxes is the password 'q a Z s 1 2 q G'. At the bottom are 'Login' (labeled C) and 'Cancel' (labeled D) buttons. The window also displays the 'TRADE CAST' logo and the 'KARACHI STOCK EXCHANGE LIMITED' logo. The footer text reads 'Copyright 2010 - 2015 CATALYST IT Solutions (Pvt.) Limited. All Rights Reserved.'

## 2. GETTING STARTED:

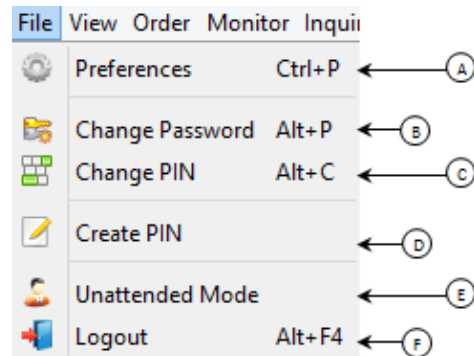

### Main Window

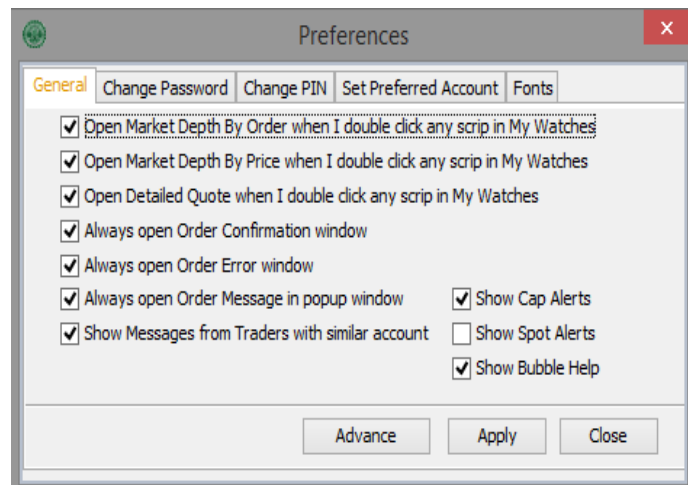

- 'Menu bar' from which you can select the menus.
- 'Tool bar' from which you can select the tools.
- 'Indices' bar.
- 'Upper Capped', 'Lower Locked' ticker.
- 'Watches' window.
- 'Market Depth By Order' window.
- 'Message Window' where you can view all the activity messages.
- 'Market Depth By Price' window.
- 'Status bar' where you can view the connectivity status.

Desktop reference 03/19 | Historical screens; confirm current version with JISPL.

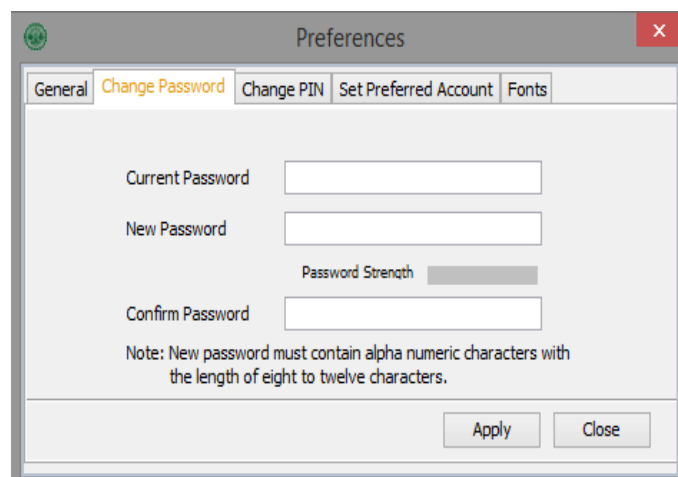

## File Menu

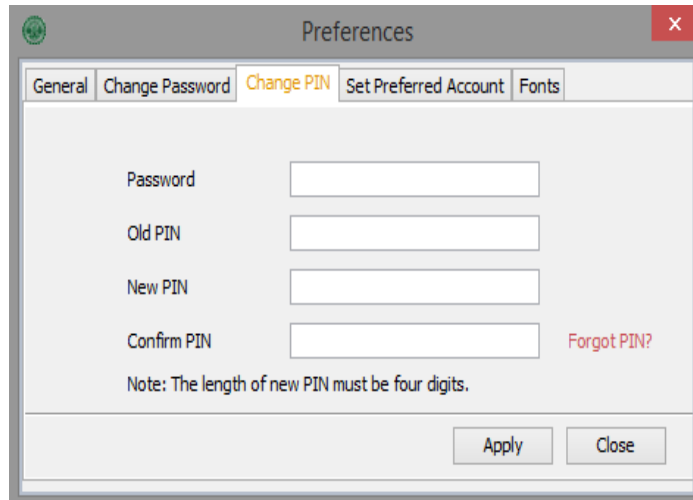

A. 'Preferences' window.

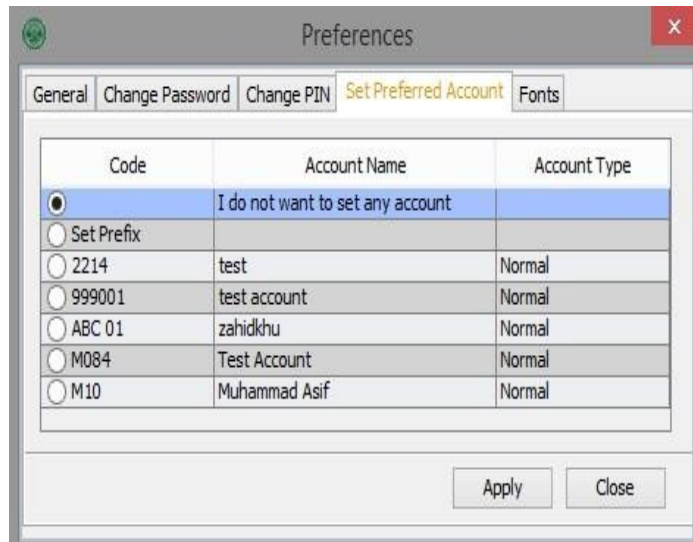

B. 'Change Password' window.

C. 'Change Pin' window.

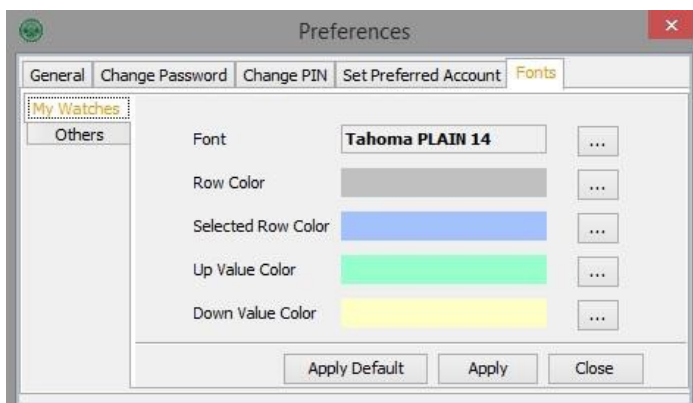

- 'Set Preferred Account' window.

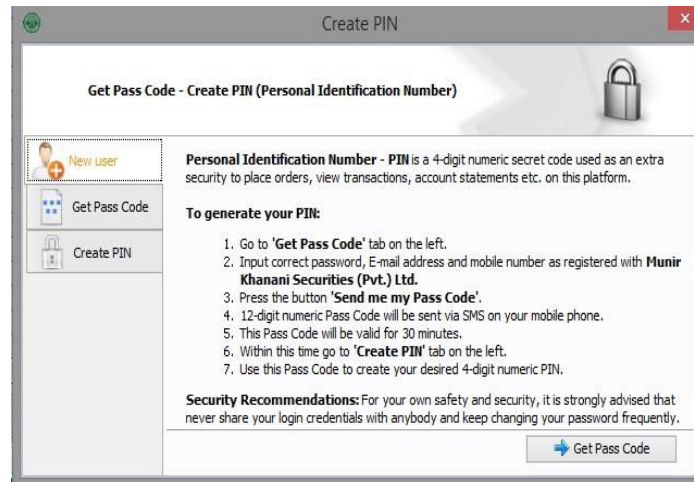

| Code                             | Account Name                     | Account Type |

# KiTS Mobile Trading App

---

## INTRODUCTION:

KiTS Trading Interface It shows buying and selling rate of shares with respect to its symbol. Within its Market Watch, it contains more detailed information about each share. The user can buy or sell their shares through this application. Furthermore, the user can keep an eye on activities happening in the market. The detailed information about the features of Trade Cast Client is described below.

## 1. INSTALLATION AND FIRST ACCESS

Obtain the approved mobile app listing and device requirements directly from JISPL. Confirm the correct application, publisher and connection settings before installation.

Use the User ID and password issued through your JISPL account activation process. The following reference screen shows the login controls. For current setup assistance, contact [jispl@jisecurities.com](mailto:jispl@jisecurities.com).

## 1. INTRODUCTION:

Tick is mobile version of KiTS Trading Interface through which Brokers/their Clients can now be able to trade through their Smartphone with ease. The detailed information about the features of Tick is described below.

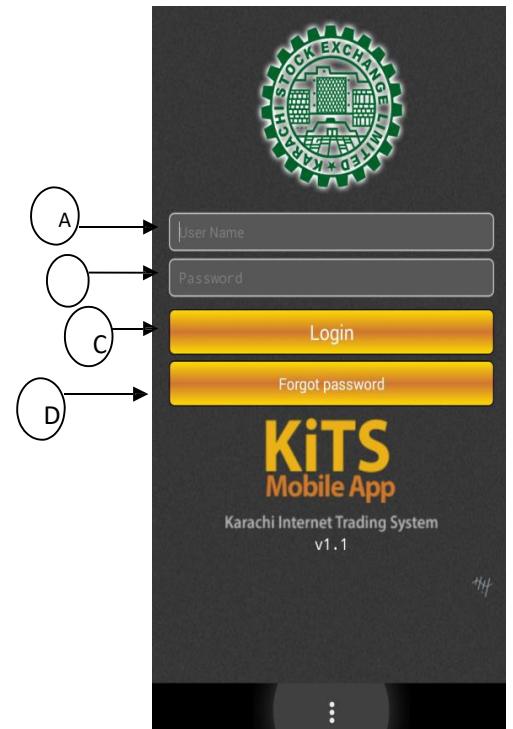

## 2. INSTALLATION PROCEDURE:

Install only the app confirmed by JISPL for your device. Use your activated brokerage-account credentials.

### Login Window

Open the approved app to reach the login screen shown below.

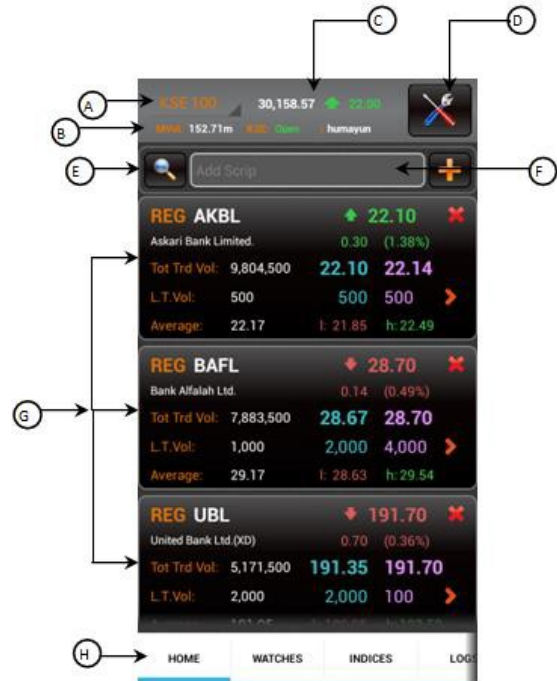

- A) Enter username.
- B) Enter password.
- C) Click 'Login' to log in the application.
- D) Click 'Register for free' to register your account.
- E) Click 'Forgot password' if you do not remember your password.

### 3. GETTING STARTED:

#### Main Window

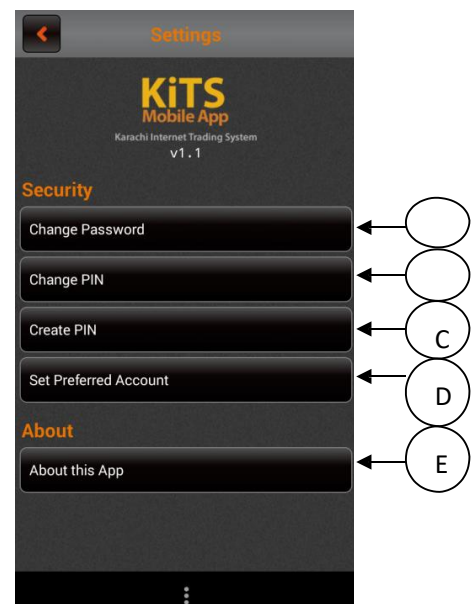

- A) Shows market name.
- B) Shows market volume, market status and username.
- C) Shows current market value.
- D) Touch this button to open Settings window.
- E) Touch this button to open scrip search window.
- F) Text box to add scrip on your market watch.
- G) Market watch window.
- H) Touch to navigate between tabs.

#### i. Settings

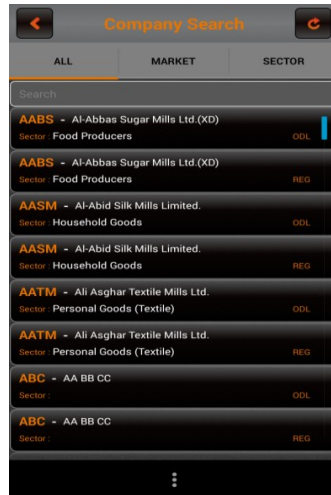

Settings window contains following options.

- A) Select 'Change Password' to change your current login password.
- B) Select 'Change Pin' to change your current trading pin.
- C) Select 'Create Pin' to create a new trading pin.
- D) Select 'Set Preferred Account' to set the priority between accounts.
- E) Shows information about the application.

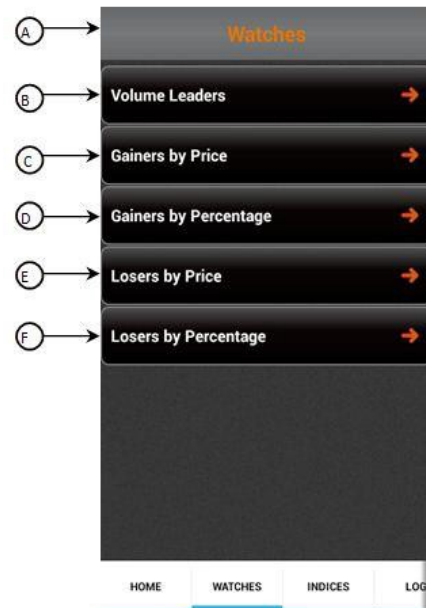

## ii. Search

By clicking on search option, the following screen will appear. This window contains list of all companies along with their symbols. You can search with respect to market, sector or contract.

## Watches

- A) Name of current tab appearing on the screen.
- B) Volume Leaders option.
- C) Gainers by Price option.
- D) Gainers by Percentage options.
- E) Losers by Price option.
- F) Losers by Percentage option.

## i. Volume Leaders

- A) Name of current tab appearing on the screen.
- B) List of symbols that are on top according to volume.

## PRACTICAL INSTRUCTIONS

# A repeatable order routine

Use this companion checklist with the actual order ticket available in your account.

### 1. Prepare

Check connectivity, market/session, selected account, available funds or eligible holdings and any account restrictions.

### 2. Choose the instruction

On desktop, use the Buy or Sell window shown on page 18. On mobile, use the order-entry control demonstrated by JISPL for your version.

### 3. Review every field

Verify market/contract, symbol, buy or sell, quantity, order type, price (where applicable) and validity. Check estimated value and applicable charges.

### 4. Submit once and record

Complete any required PIN/authentication privately. Submit once. Record the order number, time and acknowledgement; do not assume submission means a trade.

### 5. Follow the status

Review Outstanding Log and Trade Log. Pending quantity may remain unexecuted; a partial fill leaves a balance. Verify actual executed quantity and price.

### 6. Change or cancel carefully

Use the available modification/cancellation function only for the remaining eligible quantity. Confirm the result in the logs; a cancel request is not a confirmed cancellation.

#### IF THE RESULT IS UNCERTAIN

After a timeout or disconnect, reconnect and inspect the logs before trying again. If the status remains unclear, contact JISPL with the order number and time. Never share a password, PIN or OTP.

**WORKED EXAMPLE / ILLUSTRATIVE**

# Submitted is not executed

Hypothetical quantities and prices for instruction only; no security or trade recommendation.

**THE INSTRUCTION**

Buy 100 shares of hypothetical XYZ at a limit of PKR 50.00. Maximum gross value at that limit:  $100 \times 50 = \text{PKR } 5,000$ , before charges.

**ACKNOWLEDGED**

Order accepted: 100 shares requested. This alone confirms no executed quantity.

**PARTIALLY FILLED**

Trade Log shows 40 shares at PKR 49.90. Gross executed value: PKR 1,996. Remaining quantity: 60 shares.

**CANCELLATION REQUESTED**

If you request cancellation of the remaining 60, check the final response and logs. Further fills may occur before cancellation is confirmed.

**RECONCILE THE FINAL RESULT**

If the remaining 60 are confirmed cancelled with no further fills, final executed quantity is 40, not 100. Verify charges, cash and holdings in the account records and retain the confirmation.

## COVERAGE / SUPPORT

# Your reference, with context

Javed Iqbal Securities (Pvt) Ltd | TREC Holder #288

**Coverage:** The previous 8-page JISPL platform guide is incorporated, with a new contents page and expanded manual sections. All 19 desktop and 9 mobile pages supplied by you are represented in their original order. Brokerage headers, footers and installation directions have been adapted for JISPL.

**Legacy screens:** The source screenshots contain historical prices, software labels and exchange/vendor marks. These identify the software shown; they are not JISPL market quotations. Names such as Trade Cast, Tick and Karachi Stock Exchange are retained inside the reference screens to aid recognition. Actual menus and enabled functions may differ.

**Source limits:** The supplied desktop PDF contains 19 pages, although its final pages carry older printed numbers 21-23 of 32. This guide includes every page received; it does not imply that an unseen 32-page edition was supplied. The mobile source contains 9 pages.
